Arda Burak Atila

Software Developer

I study computer science at University of Pécs. I have focused on front end development, data mining and back end development since 2018. The first programming skill that I learn is Python and also I have been improving my java skill. Therefore I have some projects which are related to robotics and *parnote works. I always looking to learn new skills, take on extra responsibilities, and grow professionally. I experienced in training and mentoring new members of staff. I have worked in busy, pressurized environments where high standards are expected. Also I saw your projects and I believe will improve my skills this company.

Experience

Istanbul, Turkey

Jul 2021 - Aug 2021

Software Developer

Crede Consulting & Data Seviles

I delivered a small software collecting data from free test using Java and Regular Expressions.

Istanbul, Turkey

Jul 2021 - Aug 2021

Software Developer

Trio Mobil

I used Postman for API testing. I learned GET, POST, PULL and DELETE methods. I learned how to send requests to API. I performed API testing with the Axios method over Javascript

Education

Hungary, Pécs

Jul 2021 - Aug 2021

Computer Science Bsc.

University of Pécs

Average Score: 4.05

Hungary, Pécs

Sep 2018 - Jun 2019

Preparatory School

International Studies Center

Turkey, Istanbul

Sep 2014 - Jun 2017

High School

Private Atasehir Okyanus Science High School

Projects

ParNote Project, Pécs

In September 2020 as the ParNote team, we wanted to take the ParNote project, which we started as a lecture project at the university, to the next stage and created as a real project. ParNote is a note app based on it, but unlike many other note apps, you can collaborate with other people by inviting them to your notes, share your personal notes with other people and see theirs too. With its simple interface and stylish design, ParNote invites you to write notes..

Bootsrap, JS, Kotlin and MariaDB
